

## **IN THE CLAIMS**

This listing of claims will replace all prior versions, and listings, of claims in the application. An identifier indicating the status of each claim is provided.

### **Listing of Claims**

1-3. (Canceled)

4. (Currently Amended) ~~The transmitting apparatus according to claim 1, A transmitting apparatus for transmitting input voice data, comprising:~~

coding means for coding the voice data and for outputting coded voice data;

transmitting means for transmitting the coded voice data;

parameter storage means for storing a parameter concerning the coding performed by the coding means and a parameter concerning the transmission performed by the transmitting means in association with specifying information for specifying a receiving side that receives the coded voice data; and

parameter setting means for selecting and setting, based on the specifying information, the parameter concerning the coding performed by the coding means and the parameter concerning the transmission performed by the transmitting means stored in the parameter storage means,

wherein the parameter storage means stores, for a piece of the specifying information, a combination of a plurality of parameters concerning the coding and a plurality of parameters concerning the transmission provided with different priority levels.

5-14. (Canceled)

15. (Currently Amended) A receiving apparatus for receiving coded voice data obtained by coding voice data, comprising:

receiving means for receiving the coded voice data;

decoding means for decoding the coded voice data received by the receiving means;

parameter storage means for storing a parameter concerning the reception performed by the receiving means and a parameter concerning the decoding performed by the decoding means in association with specifying information for specifying a transmitting side that transmits the coded voice data; and

parameter setting means for selecting and setting, based on the specifying information, the parameter concerning the reception performed by the receiving means and the parameter concerning the decoding performed by the decoding means stored in the parameter storage meansThe receiving apparatus according to claim 12,

wherein the parameter storage means stores, for a piece of the specifying information, a combination of a plurality of parameters concerning the reception and a plurality of parameters concerning the decoding provided with different priority levels.

16 (Currently Amended) A receiving apparatus for receiving coded voice data obtained by coding voice data, comprising:

receiving means for receiving the coded voice data;

decoding means for decoding the coded voice data received by the receiving means;

parameter storage means for storing a parameter concerning the reception performed by the receiving means and a parameter concerning the decoding performed by the decoding means in association with specifying information for specifying a transmitting side that transmits the coded voice data;

parameter setting means for selecting and setting, based on the specifying information, the parameter concerning the reception performed by the receiving means and the parameter concerning the decoding performed by the decoding means stored in the parameter storage means, and~~The receiving apparatus according to claim 12, further comprising~~

determining means for determining whether the parameter concerning the reception and the parameter concerning the decoding stored in the parameter storage means are the latest parameters, wherein, in a case the determining means determines that the parameter concerning the reception and the parameter concerning the decoding stored in the parameter storage means are not the latest parameters, the parameter storage means updates the stored parameter concerning the reception and the stored parameter concerning the decoding.

17-38. (Canceled)
